

Pallavi Maralla Satish

Backend Developer

+1 (551) 229 1836 | pmarallas@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Results-driven Application Developer with 3+ years of experience delivering custom business applications, automated workflows, and data-driven solutions. Built and deployed enterprise applications using Zoho Creator and Zoho Analytics, integrating with AWS services to streamline operations and reduce manual effort. Skilled at translating business requirements into scalable technical solutions while collaborating across cross-functional teams. Experienced in cloud platforms, database management, and API integrations with a strong focus on improving operational efficiency.

EXPERIENCE

Application Developer

Systems Engineering Research Center (SERC)

July 2025 - Present
New Jersey, USA

- Designed and developed custom applications and workflows using Zoho Creator, implementing forms, views, and reports to automate business processes and reduce manual data entry.
- Built and published interactive dashboards and reports using Zoho Analytics to visualize key business metrics and support data-driven decision making.
- Maintained organizational databases and performed data entry, validation, and cleaning to ensure accuracy, consistency, and reliability for reporting and analysis.
- Configured and managed Amazon Route 53 for DNS routing and website hosting, ensuring reliable and consistent application availability.
- Provided IT support by troubleshooting user access, software issues, and system navigation, while monitoring and resolving internal requests in a timely manner.

SDE-I

Zee Entertainment Enterprises Limited

April 2022 - July 2024
India

- Transitioned core backend services, including Watch History and Launch API, from AWS to Google Cloud Platform, cutting cloud infrastructure costs by 15% and improving system scalability by 20%.
- Integrated the MUSIC API with the Watch History service, achieving a 25% acceleration in service performance and responsiveness, enhancing content delivery speed to end users through optimized database queries.
- Modernized complex metadata queries, decreasing API response time by 35% through consolidating ten calls into two using efficient Postgres queries, allowing the API to scale to handle 5,000 req/s.
- Standardized API documentation using Swagger/OpenAPI specifications, which clarified integration processes for five external partner teams and boosted developer onboarding speed by 60% through seamless handover processes leveraging developer tools.
- Championed Agile methodologies using Jira, driving continuous feedback loops and adaptive strategies that improved team response time to critical bugs by 40% during sprints, utilizing robust observability platforms for proactive issue detection.
- Expedited software delivery pipelines by 40% through Git-based strategies, including branch management and automated testing; decreased deployment failures by 15% and accelerated feature release timelines with enhanced CI/CD practices.

Android App Development Intern

JSW Pvt Ltd

March 2021 - May 2021
India

- Developed and deployed a Kotlin-based MIS Generator mobile application to centralize and automate report sharing, replacing manual email distribution and increasing cross-team efficiency by 60%.
- Orchestrated a pivotal system migration, decreasing latency by 70% and delivering a seamless transition with zero critical downtime; awarded 'Best Project Contribution' out of 20+ interns by leveraging efficient API design.
- Centralized fragmented knowledge base articles into an organized internal wiki, resulting in maintenance engineers resolving queries 75% faster by providing easily searchable solutions through optimized database structures.

EDUCATION

Masters of Science - Computer Science

Stevens Institute of Technology

September 2024 - Present

Bachelor of Engineering - Computer Science and Engineering

Dayananda Sagar College of Engineering

July 2018 - July 2022

SKILLS

Backend Development Node.js, Express.js, Spring Boot, RESTful APIs, Microservices, API Gateway, gRPC, API Versioning, API Monitoring, Load Balancing, Caching Strategies, Message Queues, Distributed Systems, Java, Kafka

Data Management & Databases Amazon DynamoDB, Apache Kafka, MongoDB, MySQL, PostgreSQL, Redis, ScyllaDB, Azure SQL, Database Tools, NoSQL

Cloud Platforms & Services AWS, AWS Lambda, Amazon S3, Google Cloud Platform, GCP Cloud Functions, GCP Cloud Storage, Containerization, Azure, Azure Functions, Azure Key Vault, Amazon Route 53

Programming Languages JavaScript, Kotlin, Python, TypeScript, Java, Node, React

DevOps & CI/CD AWS CodeBuild, AWS CodePipeline, CI/CD, Configuration Management, Docker, GitHub, Kubernetes, Monitoring and Logging, Git, Branch Management

API Design & Development API Documentation, Swagger, OpenAPI, API Performance Optimization, API Security, API Testing, Authentication, Authorization, Rate Limiting, API Design Principles

AI & Machine Learning AI/LLM-powered Applications, LLM Integration, Document Chunking

Project Management & Collaboration Tools Agile Methodologies, Jira, Observability Platforms

Business Applications Zoho Creator, Zoho Analytics, Zoho Survey

PROJECTS

Query Plot

Engineered a user-friendly React interface featuring LLM integration, facilitating real-time dataset modifications and streamlined query submissions, enhancing data interaction.

Orchestrated the automatic generation of data visualizations by constructing API calls to an LLM, enabling users to produce 5 distinct plot types based on inputted parameters.

Technologies Used: React, Python, LLM Integration
